Hindi

## PROFILE

I am a self-taught frontend developer seeking a professional job opportunity with a reputed organization where in my ability and education will be utilized to the maximum level contributing to the success of the organization and self-growth in the company hierarchy.

## PROJECTS

### • Learning website design

This responsive website design leverages HTML, CSS, and Flexbox to create a seamless user experience across all devices. Utilizing Flexbox for flexible layouts ensures content adjusts dynamically to different screen sizes, providing a consistent and intuitive interface.

### • User Mangement System

This user management system handles user data and authentication, allowing users to sign up, log in, and manage their profiles securely. Key features include signup, login, OTP verification, JWT authentication, and CRUD operations. Technologies used: HTML, CSS, Bootstrap for front-end; JavaScript, Node.js for back-end; MongoDB for the database.

### • Blogging Platform

This basic blogging platform built with ReactJS and NodeJS features user authentication, and CRUD operations for posts. Users can register, log in, create, read, update, and delete blog posts. The platform uses MongoDB for data storage and HTML/CSS for styling.

## WORK EXPERIENCE

### Web Developer (intern)

Stackmod Innovations - Thiruvananthapuram
